Dear Mr. Otto:

RE: Classification of Dredge Spoils Presently
Stored on City Light Property

We have completed our review of the test data derived from a composite sample of dredge spoils currently stored on City Light property. Our review included consultation with staff from the Northwest Regional Office of the State Department of Ecology. Based on the results of the tests, we are classifying the dredge spoils as an acceptable fill material. All contaminant levels were well below our threshold for determining solid waste.

If you have any questions or would like additional information, please call me at 587-2722.

Sincerely,

Wally Swofford, Supervisor
TOXIC/HAZARDOUS MATERIALS PROGRAM
